EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven Rosen on or about 6/9/2005.

The application has been amended as follows:

Claim 1 has been amended as follows: on l. 1 of the claim, "A nozzle" has been changed to -- A gas-turbine engine nozzle --.

Allowable Subject Matter

2. Claims 1-14 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter: prior art does not teach in combination with the other limitations of claim 1, an ejector cooling air inlet in an aft portion of the fairing. Note that: 1) patentable weight was given to the preamble because it breathes meaning and life into the claim by distinguishing the claimed nozzle comprising an ejector from similar terminology employed in the pump art, class 417; 2) because the fairing surrounds the divergent section, and the divergent section is the most aft element of the nozzle, the claimed cooling-air inlet must be positioned in the aft part of the engine's nozzle (see quoted dictionary entry).

Art Unit: 3746

Main Entry: **¹aft**

Pronunciation: 'aft

Function: *adverb*

Etymology: Middle English *afte* back, from Old English *æftan* from behind, behind; akin to Old English *æfter*

: near, toward, or in the stern of a ship or the tail of an aircraft.

Also note that in order to be an ejector and function as such, the air pressure at inlet 50 MUST be greater than the exhaust gas pressure at ejector outlet 41 in Fig. 1.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Johnson 6398129, Broadway 5839663, Thayer 5335489.
